

VISIONAIRE, INC.

Conflict Minerals

Visionaire has incorporated a conflict free policy and is requesting that all of its vendors provide products that contain no conflict minerals. An email has been sent to all of Visionarie's major suppliers requesting them to fill out and return EICC form.

With good confidence Visionaire is declaring most products they provide do not contain conflict minerals. These products include sheet metal housings, paint and powder coatings, seals and insulation, hydraulic motors and compressors, evaporator and condenser coils, and most fans / blowers.
